Introduction

- Current print process is manual, slow, and unclear
- Users waste time visiting shops and waiting
- Print instructions are often mis-communicated
- No visibility into order progress

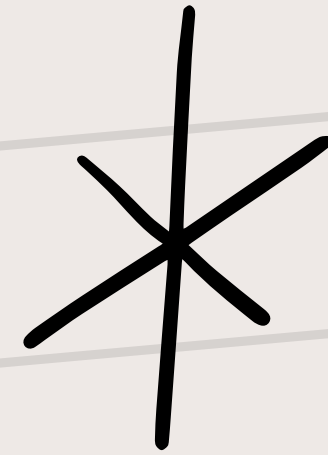

Project Overview

- mobile platform for digital print ordering
- customers choose a shop, upload files, configure print settings, select slot or queue, track status, and collect prints
- staff manage jobs through workflow stages
- admin manages shops and staff

Motivation

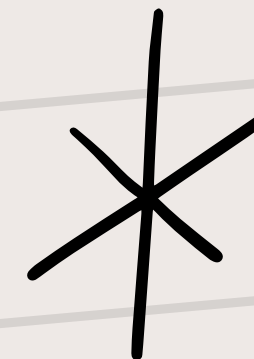

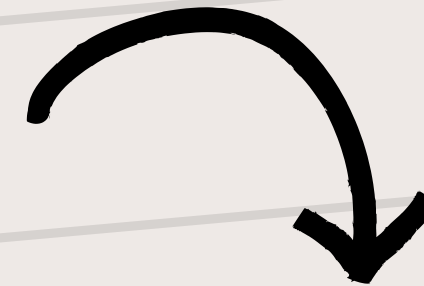

- Long physical queues
- Repeated shop visits
- Unclear order status
- Inefficient manual shop workflow
- Demand for campus-friendly digital service

Target Audience

- University students
- Teachers and office staff
- Local public customers
- Print shop operators
- Platform admin

Remote Print Request

Wallet-Based Payment

**Document Upload with
Print Configuration**

**Shop Staff and Admin
Dashboard**

**Automatic Price
Calculation**

**Push and In-App
Notifications**

**Slot Booking + Smart
Queue**

**Order History + Receipt
Generation**

Order Tracking

**Pickup / Delivery
Fulfillment**

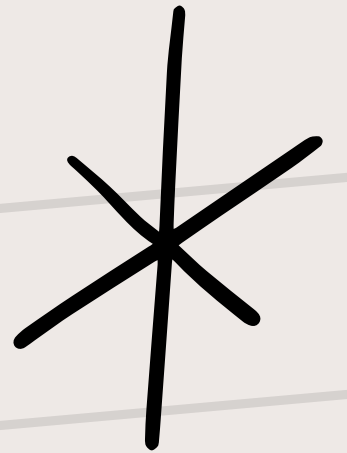

FEATURES

```
graph TD; F((FEATURES)) --> R1[Remote Print Request]; F --> R2[Wallet-Based Payment]; F --> R3[Shop Staff and Admin Dashboard]; F --> R4[Push and In-App Notifications]; F --> R5[Order History + Receipt Generation]; F --> R6[Pickup / Delivery Fulfillment]; F --> R7[Order Tracking]; F --> R8[Slot Booking + Smart Queue]; F --> R9[Automatic Price Calculation]; F --> R10[Document Upload with Print Configuration];
```

Tech stack

- React Native (Expo)
- NestJS
- Supabase Auth
- Supabase PostgreSQL
- Prisma
- Cloudinary
- Expo Notifications
- WebSocket
- Render

Conclusion

PrintSlot solves a real daily problem, reduces queue time, and reduces uncertainty, improving print shop efficiency. Production-oriented architecture scalable for future payment, delivery, and analytics expansion
